

RCEW LIBRARY

1. Introduction: The RCEW Library started with the inception of the college itself and has grown progressively to its present status. Initially located at ground floor near administrative office and shifted to first floor (L-3) with the growth of books and journals & magazines. Presently it is situated in the administrative block. A new digital library has also been established with good configuration computers. The reading area is attached to it. The library is airy, fully of light and clean. Library is a living organism of the institution. The number of books and journals has grown substantially in the session 2010-11 as the academic department also increased in the institute.

Infrastructure: Library building and other facilities play a major role in the good library. There are approx 5500 sq ft area for reading and stacking area in the library having good quality furniture and fixtures. It situated in the center of the RCEW and easy approach of all the departments and students. Libraries are soul of any institution and for the better environment of reading a good infrastructure and facilities are required. The growth of the library kept an increasing and therefore the asset like Elmira, book self, computers were increased accordingly. The re-oriented of arrangement and addition of separate reading room were included in the library. This reading area is well furnished and air conditioned to provide the proper reading environment to the student. It provides reading space for 100 readers at a time. The library was also facilitated with e-journal. The volumes of books, journals and magazines increased to the large size needing addition fixtures. The addition of bookshelves, journals demanded re-orientation again. The academic strength of various departments also increased and new courses are added in the institute.

Library Books: The RCEW Library is a world-class collection of digital and printed resources on all areas of engineering and technology. We specialize in Management, Electrical, Electronic & Communication, Civil Engineering and Computer Sc. Engineering. Our collection contains approx 32500 printed books and 72 National and International Journals and magazines
